

KRYPTON₃

The opinion of the lab

The Krypton 3 is the only compact speaker in the range. It contains, in a small volume, a condensation of technologies resulting from nearly 35 years of expertise.

Regarding the technologies...

The technical team has worked on each of the transducers to bring transparency and veracity to the sound message. Its 13 cm diameter driver, composed of its Kevlar membrane (7th generation) and a machined metal bullet for dispersion, ensures the reproduction of frequencies from 55 Hz to nearly 4 KHz. The new tweeter of the range, equipped with a rear decompression chamber and a dome in impregnated fabric of 28 mm of diameter, deals with the high frequencies (4000 to 24 000 Hz). Its two transducers are each surrounded by a circular foam that reduces the problem of wave bouncing near the emitting sources. With the aim of course of making the message more detailed, more precise.

Regarding the design...

Available in 3 very trendy finishes, the KRYPTON 3 is proposed with a magnetic cover, itself covered with a mottled fabric of the most beautiful effect. Two slats are screwed on the bottom of the speaker to slightly incline the top of the speaker towards the back and thus allow a perfect phasing of the drivers. Note also that small anti-slip pads act as decoupling of the speaker from its support.

A speaker easy-to-live with...

Ultra compact, with a laminar decompression port on the front, the Krypton 3 is an easy to power speaker. Its neutral character and its good performance will allow it to be coupled with all the current electronics of the market.

3 different finishes :

Bass reflex : laminar port
Nom. Power : 80 W
Max. Power : 120 W
Number of ways : 2
Number of speakers : 2
Sensitivity : 89,5 dB

Frequency range : 55-24000 Hz
Tweeter : 28mm soft dome
Midrange : Kevlar 13 cm (5 inch)
Woofer : -
Impedance : 4...8 ohms
Frequencies cut : 4000 Hz
