  - 25 mm soft dome
  
- 3** Light oak finish
  
- 4** Screw terminal
  
- 5** Laminar port in front

## • The lab's opinion

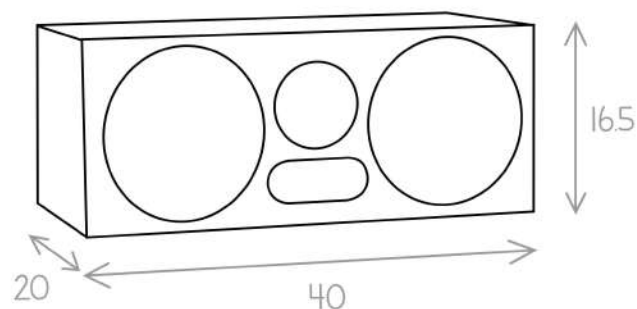

---

MIA 15 is the central speaker of the MIA range.

Perfectly consistent with the other models of the range, it will be easily placed under a TV.

We recommend the use of this speaker in «SMALL» mode, that is to say that during a manual configuration of your speaker, on an audio/video amplifier, it is better to cut the very low frequencies (below 80 Hz), to increase its power hold.

Available in light oak finish.

Light oak

## • Specifications MIA 15

---
