

# High Fidelity Speakers

Collection 2023

1. STELLAR p.3

2. DREAM p.6

3. COURBET p.9

4. KRYPTON p.12

5. ARIANE p.15

For the past 35 years, Davis Acoustics has set out to create high-quality speakers designed for the most demanding listeners.

Based on this experience, Davis invites you to discover its new creations. All these products were developed to achieve a true musical sensation in multiple environments, from conventional stereo listening to state-of-the-art home theater application.

The newly designed shapes and the specially selected wood grades allow for an agreeable addition to any home interior.

Let us seduce you  
Happy listening...

# 1. STELLAR

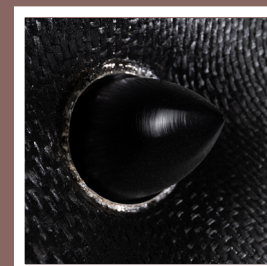

**Stellar is the best speaker ever produced by DAVIS.**

More than a simple enclosure, we have decided to create a sculpture that you would be the only one to own. This monolith is indeed available in the color of your choice, to become a unique piece. From a sound point of view, you will be delighted by an ultimate transparency and a very wide bandwidth which will plunge you in the heart of the music.

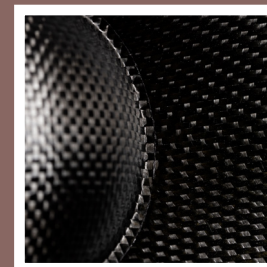

S T E L L A R

The finish of your choice

Completely Made in France, the drivers that equips those speakers represents the very best of the Davis' know how.

The Carbon 25cm is an ideal speaker for a firm and fast bass.

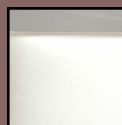

## STELLAR

Proud of its 36 years of experience in the constant search for improvement of its drive units, DAVIS Acoustics now offers an exceptional loudspeaker model: the STELLAR. Strongly inspired by Christopher NOLAN's movie: INTERSTELLAR, it embeds exceptional components to establish a new reference in the world of high fidelity. Designed in France, from the best drivers of the brand, ever, STELLAR is always available in a black lacquer finish, timeless, as well as in the finish of your choice (lacquered, multicolored, metallic...).

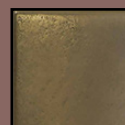

3-way / 3 composite cone drivers, a frequency crossover with steep and optimized slopes, designed from the best components on the market, STELLAR is a model that has been designed and conceived without any concession. Its shape (teardrop), its front panel (curved with a bell mouth) and all the technologies used for its implementation make it a unique product, intended for the most demanding music lovers.

It is your imagination that will determine  
the aesthetic limits of the product.

## DREAM

### The supreme range, beyond the limits.

Dream is the name we wanted to give to our «Hall of Fame». It is a space where advanced techniques and our know-how rhyme with French craftsmanship. Based on the 3 iconic loudspeaker models of our company, this product line stands out for its innovative and proprietary technological solutions.

The **13 KLV5**, our first loudspeaker (created in 1986), has undergone many modifications over the years. Here it is sublimated in our compact **Olympia One Master 35**. Accompanied by selected technical components and serious cabinetry, this little speaker will give you a great musical experience.

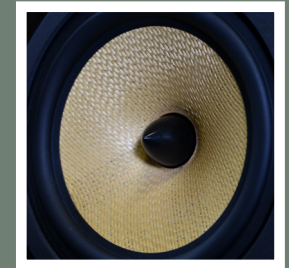

The **20 TK8**, our famous woofer/midrange driver, is the centerpiece of our **NIKITA 3.0**. The extraordinary acceleration of this 20 cm diameter transducer (made possible by the overpowering magnetic motor) transmits the music in a fluid and lively way. Forget the technique and let yourself be transported by the naturalness.

Our **20De8** (Full Range, the latest creation of the brand's founder) expresses itself with ease in the bass reflex load given to it by the **MV ONE MASTER**. This column, refined on the back, represents the nirvana for many connoisseurs. The loudspeaker plays the entire audible spectrum (40...20 000Hz) without a filter. It is perfectly free and makes the listening both dynamic and transparent.

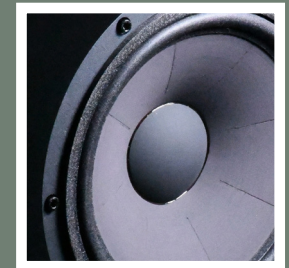

D R E A M  
Range

Fantastic quality !

Completely Made in France, the drivers that equips those speakers represents the very best of the Davis' know how.

The 20 De8 model is the most complex speaker in our catalog. We wanted to sublimate it with this MV One MASTER.

## M V ONE MASTER

Without a doubt the most atypical loudspeaker on the market (floorstanding one way!). This new version offers 3 different connections that allow 3 different tones, to adapt to your electronics and to your room. Available in rare wood species: ebony, golden bamboo, tamo ash or black piano.

## NIKITA 3.0

The biggest of our compact models, Nikita 3.0 has a midrange/woofer that reach high quality bass in such a speaker size.

## OLYMPIA ONE MASTER 35

To celebrate our 35th anniversary, we wanted to reissue this iconic model in rare wood species (ebony and ash «TAMO»), adding internal components of superior quality (capacitors, internal wiring, terminals, air filtering ...). Still made in France, in our workshop in Troyes (10- AUBE), the Olympia One 35 will sublimates your listening.

# 3.

## COURBET

### **Some state-of-the-art technologies in discreet and modern enclosures.**

Elegant and slender, the speakers in the Courbet range enclose the brand's technical know-how in a resolutely modern case. Nothing has been left to chance, as evidenced by the handcrafted manufacture of the crossovers (wired in the air, from carefully selected components), the use of composite membranes dear to the brand (carbon, aramid fiber ...), or even an internal wiring coated with Teflon PTFE . This line of products, which proudly claims a French manufacture in the rules of the art, will also know how to convince you by the balanced and realistic listening it provides.

 Picture of our Kevlar cone with bullet in charge of the midrange frequencies.

 Détail of the Davis carbon cones (to reach realistic bass).

## COURBET N°8

The latest floor standing speaker in the range will surprise you with its overall qualities. Designed for very large spaces, this model uses a new 21 cm «house» boomer with carbon cone. It's not afraid of battery hits!

## COURBET N°7

The Courbet n°7 is the big brother of Courbet n°5, the bigger woofer permit to reach extremely deep bass, at very high levels. The very flat frequency response guarantees a very detailed sound.

## COURBET N°5

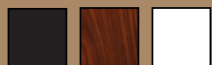

Extremely compact, the intermediate floorstanding of the range can reach a very accurate sound from low bass to very high frequencies.

## COURBET N°4

The smallest floorstanding speaker of the catalogue but it sounds like much bigger !

## COURBET N°3

The Courbet n°3 is the bookshelf speaker of this range. It has been designed for rooms up to 25 m2.

## KRYPTON

**Balance, subtlety under all conditions.**

With a Krypton series loudspeaker, you are assured of acquiring a condensed technology, in a compact volume, perfectly studied.

The most accessible range equipped with our famous composite membrane, you will feel the spirit of music through discrete speakers where every detail is revealed with accuracy, as evidenced by the many rave reviews in the international specialized press. Add to this a modern and contemporary design available in three complementary colors. The music flows.

K R Y P T O N  
Range

For a perfect homogeneity of the range, our famous 13 cm (5 inch) driver is used in all the models of the range.

DAVIS decided to tilt its speakers backwards for a perfect alignment of the drivers, but also to ensure an elegant silhouette.

The entire range is available in 3 «trendy» finishes.

Available in 3 finishes

## KRYPTON 9

The «grand spectacle» speaker by definition. The model 9 ensures the reproduction of a very wide bandwidth, while keeping a very good rigor in linearity.

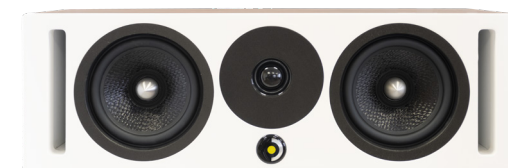

## KRYPTON 6

Discreet and slender, the small floor standing speaker of the range disconcerts by its accuracy and its joy of living!

## KRYPTON 3

Placed on an elegant stand, this 2-way speaker transmits music with precision, softness and sensuality.

## KRYPTON C

Placed on an elegant stand, this 2-way speaker transmits music with precision, softness and sensuality.

## ARIANE

### Welcome to the world of HIFI.

Nothing like ARIANE for the launch of a product line...

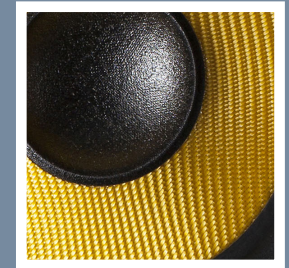

This line of speakers perfectly symbolizes the leitmotiv that DAVIS has been pursuing since its beginnings: to make high fidelity accessible to all.

Simple and elegant shapes, suitable materials (like fiberglass or cellulose pulp), Mastered filtering plans... all the good old technological recipes stored for years at DAVIS Acoustics are found in this series of products. With an Ariane, you will be sure to enter the world of high fidelity or home cinema on the right foot, without breaking the bank.

## ARIANE Range

The protective covers are rounded for a modern aesthetic effect

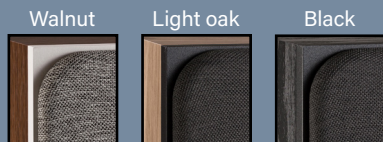

Our midranges are using fiber glass cones.

Soft dome tweeter to guarantee accurate high frequencies.

Available in 3 finishes

## ARIANE 7

From the organ to the cymbals, all the instruments of a symphonic orchestra are present with the same energy. Which gives necessarily a pleasant sensation of realism.

## ARIANE 5

The smallest floorstanding speaker of the DAVIS'range. For both Hifi and for Home theater.

## ARIANE 1

The smallest speaker of the whole range, but already the first sensations !

## ARIANE C

The central Ariane C fits perfectly with the other products of the range ! Same tweeter, similar woofers and Xovers...
